4858hammad.github.io/hammad-ali.github.io

Key Achievements

- 500+ payment transactions per month automated via a custom Mastercard provider
- Manual accounting data entry eliminated entirely through Sage to Odoo sync
- 40% reduction in sales order follow-up time via lifecycle automation
- 25% faster page load after ORM and query optimisation
- Zero data loss across a full HR module migration from Odoo 16 to 17

Work Experience

TTI Testing Laboratories, May 2026 - Present

Python / Odoo Developer

- Built an employee self-service portal on Odoo 18 Enterprise with custom OWL components, giving staff self-service access to payslips, attendance records and HR data, raising missing-attendance requests, and routing leave requests to managers for approval
- Developed an attendance dashboard with OWL front-end components consolidating check-in and check-out records into aggregated management reporting, covering remote employee attendance, staff on leave, and late arrivals
- Built a Field Sales Person module with a custom OWL interface, linking sales representatives to customers and territories, tracking targets against achievement, and recording payment recoveries collected in the field
- Built an employee loan management module covering request, approval, disbursement and payroll-linked installment recovery
- Delivered POS and payment-gateway customisations across Odoo Accounting and Sales

Aetos Technologies, Jan 2025 - Apr 2026

Team Lead, Jan 2026 - Apr 2026

- Led Odoo development team of 3 engineers delivering ERP solutions across Accounting, CRM, Sales, and Inventory
- Built Sage ↔ Odoo integration that eliminated manual data entry (100% automation)
- Integrated the Doctor portal with the ClearPath Odoo ERP system
- Coordinated delivery across client requirements, support, and production releases

Odoo Developer, Jan 2025 - Dec 2025

- Developed Mastercard payment module and automated 500+ transactions per month
- Created Sale Order automation that reduced follow-up time by 40%
- Integrated REST APIs (RingFree, Firebase) for billing and automation
- Led Odoo 16 to 17 migration with zero data loss

Axiom World, Aug 2023 - Jan 2025

Python Developer

- Developed 5+ custom Odoo modules (Sales, Inventory, Accounting)
- Improved system performance and reduced load time by 25%
- Integrated third-party APIs and removed manual CSV workflows
- Customized reports (QWeb) and dashboards for business insights

Hazel Mobile, Aug 2022 - Nov 2022

Mobile Application Developer

- Built Android application features using Java and Kotlin
- Applied MVC and MVVM patterns in app development
- Collaborated on feature design, testing, and QA across releases

Technical Skills

ERP / Odoo: Odoo 16/17/18/19, Odoo ORM, OWL, QWeb, XML Views, Community & Enterprise

Backend: Python, Flask, Django, REST API, PostgreSQL, JavaScript

Integrations: Mastercard, Sage API, RingFree, Meta API, Firebase, Biometric Devices

DevOps: Docker, Git, Linux, Nginx

Mobile: Android, Java, Kotlin, React Native, Firebase

Tools

GitHub, Postman, PyCharm, VS Code, Android Studio, Docker, Nginx, Linux, Google Colab

Education

Lahore Garrison University, Jul 2019 - Jul 2023

BS Computer Science

Projects

Field Sales Person Module — TTI Testing Laboratories, 2026

Modules: Sale, CRM, Contacts, Employees, Accounting | Python, Odoo ORM, OWL, JavaScript, PostgreSQL, QWeb

Built a custom Odoo 18 Enterprise module to manage field sales representatives — assigning them to customers and territories, setting targets and measuring achievement against them, and payment recovery tracking for collections made during customer visits. Field activity feeds back into the Sales pipeline, and the interface is built with custom OWL components in the Odoo web client.

Employee Self-Service Portal — TTI Testing Laboratories, 2026

Modules: Employees, HR, Portal, Time Off, Payroll, Attendance | Python, Odoo ORM, OWL, JavaScript, QWeb, PostgreSQL

Built an employee self-service portal on Odoo 18 Enterprise for TTI Testing Laboratories. Staff access their own payslips, attendance records and HR data directly, raise missing-attendance corrections and leave requests, and managers approve leave from the same portal — taking HR out of the middle of every routine request. Access is scoped with Odoo record rules and access groups so each employee sees only their own data and each manager only their own team.

Attendance Dashboard — TTI Testing Laboratories, 2026

Modules: Attendance, Employees, HR, Time Off, Reporting | Python, Odoo ORM, OWL, JavaScript, PostgreSQL, QWeb

Developed an attendance dashboard in Odoo 18 Enterprise consolidating check-in and check-out records into a single management view. It covers remote employees alongside on-site staff, surfaces who is currently on leave, and flags late arrivals, with aggregated reporting across employees and date ranges for HR and operations. The dashboard front end is built with custom OWL components.

Employee Loan Management — TTI Testing Laboratories, 2026

Modules: Employees, Payroll, Loans, Accounting | Python, Odoo ORM, PostgreSQL

Built an employee loan management module in Odoo 18 Enterprise covering the full loan lifecycle — request, approval, disbursement and installment recovery — with deductions flowing through to payroll.

Sage Integration — Aetos Technologies, 2026

Modules: Accounting, Contacts, Invoicing, API Integration | Python 3.10, Flask, PostgreSQL, Docker

Built a Flask-based connector to sync Sage invoices, customers, and companies with Odoo Accounting using a scheduled REST API pipeline. Automated partial payments and reconciliation with robust error handling.

Mastercard Payment Provider — Aetos Technologies, 2025

Modules: Accounting, Invoicing, Payment | Python, Odoo ORM, REST API

Built a custom Mastercard payment provider for Odoo 17 and Odoo 18 across Community and Enterprise environments, enabling automated invoice settlement directly inside Odoo Accounting.

Tazah Technologies — Sale Order Flow — Aetos Technologies, 2025

Modules: Sale, Purchase, Inventory, Accounting | Python, Odoo ORM, PostgreSQL

Designed and implemented a custom Sale Order Flow module to automate and track the lifecycle of sales from quotation to delivery and payment. Reduced order follow-up time by ~40%.

Prime Global Imports ERP Customization — Axiom World, 2025

Modules: Sales, Invoicing, UI Customization, Navigation | Python, Odoo ORM, QWeb, PostgreSQL

Worked on customization and enhancement of an Odoo 18 Enterprise ERP system for Axiom World, focusing on backend UI and UX improvements, a custom sidebar layout, an enterprise-like home menu experience, and advanced QWeb report customization for sales and invoicing modules.

Silicon Signs ERP Customization — Axiom World, 2025

Modules: Manufacturing, Sales, BOM Management, Production | Python, Odoo ORM, PostgreSQL

Worked on a fully customized Odoo 18 Enterprise ERP implementation for Silicon Signs through Axiom World, focusing on manufacturing optimization, BOM version control, and cross-module ERP enhancements. The system was extended to support intelligent BOM versioning, BOM comparison, and client-specific manufacturing selection workflows integrated with sales and manufacturing execution.

RingFree Integration & Customization — Axiom World, 2024

Modules: Accounting, Sales, Metered Billing, Bank Payment Sync | Python, REST API, Odoo ORM, PostgreSQL

Developed a full integration between Odoo ERP and the RingFree external platform to automate usage-based metered billing and financial synchronization. The system ensured accurate usage calculation, automated invoice generation, and seamless bank payments reconciliation.

Fell ERP Development — Axiom World, 2024

Modules: Sale, Purchase, Inventory, CRM, Exceptional Reports | Python, Odoo ORM, PostgreSQL

Designed and developed a customized ERP system focused on operational visibility and daily business reporting. The system consolidated key business activities across sales, purchase, inventory, and CRM into a centralized exceptional reporting engine with automated notification capabilities.

ClearPath Orthodontics ERP — Internal Project, 2026

Modules: Manufacturing, Logistics, Sales, Inventory, HR | Odoo ORM, Python, PostgreSQL, Biometric Integration

Integrated and extended an Odoo 18 Enterprise ERP for ClearPath Orthodontics, including a Doctor Portal for patient orders, prescriptions, and clinical workflows, along with shipping and logistics flows for order fulfillment and delivery.

Axis Marketing Management — Internal Project, 2026

Modules: CRM, Customer Portal, Contract Management, HR | Python, Odoo ORM, Meta API, PostgreSQL

Developed an Odoo 19 Enterprise marketing management system connected with Meta for timely campaign updates, lead generation, and customer license and renewal tracking.

HRMS Bundle Migration (16 → 17) — Axiom World, 2024

Modules: Employees, Payroll, Loans, HR Tax | Python, PostgreSQL, Odoo ORM

Migrated Employees, Payroll, Employee Loan and HR Tax modules from Odoo 16 to 17. Preserved complex payroll structures and loan installment logic with zero data loss.

University and personal projects — 2022

Kotlin, React Native, Django, Firebase, .NET MVC

Android and cross-platform mobile apps (Showroom Ecommerce, PavoBibox, Idea Pitching) with Firebase sync and authentication, plus a .NET MVC web CV builder.

Certifications

Business Development, Lahore Garrison University, Jan 2023 - Jul 2023

Docker Training Course for Absolute Beginners, KodeKloud, 2024

Languages

English, Urdu
